IBA Molecular presents its new IntegraLab[®] solution at SNM'08

Louvain-la-Neuve, Belgium, April 24th, 2008 – IBA (Ion Beam Applications S.A.) announced today, that its business unit, IBA Molecular, will present the IntegraLab[®] solution at the 2008 Society of Nuclear Medicine Annual Meeting in New Orleans, LA, USA.

IntegraLab[®] is a global solution combining products and services for the production of radiopharmaceuticals. IntegraLab[®] includes among others, building design according to cGMP and the selection, integration, supply and installation of suitable equipment to match customer's radioisotopes production goals.

"Acquiring a cyclotron is only the first step in a complex project in which several items and equipment must be integrated into a consistent solution", said Olivier Legrain, President of IBA Molecular.

"We have realized that, in order to guarantee the SUCCESS of our customers' projects, providing full SUPPORT for a cost-effective solution has become a must. In keeping with our constant aim of providing BEST SCIENCE to all of our customers, for several years now we have had a dedicated team of experts to assist in developing fully compliant GMP solutions", said Delphine Blampain, Facility and Process Engineering Manager of IBA Molecular.

The IntegraLab[®] concept is explained through an interactive show on IBA Molecular booth #1034 during the whole SNM'08 congress.

About IBA

IBA delivers solutions of exceptional precision in the fields of cancer diagnosis and therapy. The company also provides sterilization and ionization solutions to improve the hygiene and safety of everyday life. IBA is listed on the pan-European stock exchange EURONEXT and belongs to the BelMid index.
